Data & Risk Analyst | Fraud, Compliance & Controls | AI & Automation | SQL | Python | Excel/VBA | BI & Reporting

SUMMARY

Data and risk analyst with 2+ years of experience across EU compliance operations (Amazon, since Apr 2025) and financial services (Aditya Birla Sun Life). Finds where processes break and builds the fixes: validation and automation tools, risk models and control dashboards, delivered with AI. Fully funded Erasmus+ scholar at the University of Padova; Invent & Simplify Award (Director/L8).

SKILLS

Risk & Compliance: Fraud and Compliance Investigations, Operational Risk, Controls Testing, Audit, Root-Cause Analysis, KYB/Registry Verification
Data & Analytics: SQL, PostgreSQL, SAS, Python (AI-assisted), Advanced Excel/VBA, Trend Analysis, Regression
AI & Automation: LLM and Agentic AI Tools, Process Automation, Human-in-the-Loop Review, ML Requirements
Reporting & Delivery: Tableau, Power BI, Amazon QuickSight, Dashboards, Requirements (BRD), UAT, Training

EXPERIENCE

Compliance Specialist | Amazon — EU Compliance Operations, Bangalore | Apr 2025 – Present

- Investigate seller accounts for fraud and compliance risk and action enforcement, including delisting fraudulent sellers.
- Built a validation and automation tool used by teams in three countries, automating most checks across EU business registries with zero errors and routing exceptions to human review.
- Designed an operational risk model for a high-volume seller-appeals process, showing leadership where operational exposure concentrates.
- Built registry and KYB check engines for six EU countries, cutting per-seller lookups from minutes to seconds.
- Piloted establishment validation at high accuracy, replacing a manual per-case check, and cross-checked tens of thousands of previously validated records to raise accuracy.
- Built a leadership control dashboard (capacity vs demand, plan vs actual, hours saved) and defined its machine learning layer with an ML product team.
- Built audit dashboards that extract evidence from documents automatically, and a defect dashboard with root-cause analysis; co-own a requirements document for a tool integration.
- Delivered 19 tools and builds in about a year, most self-initiated; led a 2-member team in an Agentic AI cohort and finished the project first.

Manager | Aditya Birla Sun Life Insurance, Trivandrum | Sep 2024 – Apr 2025

Manager · Bancassurance (HDFC Bank channel), NRI financial products

- Managed a team of 8 relationship officers across four HDFC Bank branches for a ~₹15 crore NRI financial-products portfolio, owning partner relationships.
- Tracked branch and portfolio performance data to spot gaps and prioritise follow-ups.
- Standardised documentation checks on NRI applications to improve onboarding accuracy and cut rework.

PROJECTS

Public demos on synthetic data: appeals-risk-exposure-model (trend and root-cause analysis, exposure heatmap, what-if scenarios) | segmentation-logic-explorer (rule tester with conflict and overlap checks) | sql-analytics-project (17 graded SQL queries, joins to window functions) | jithinjolly2000-maker.github.io

EDUCATION

PGDM (MBA equivalent) – Marketing & Finance | Rajagiri Business School | 2022 – 2024
Erasmus+ KA107 fully funded scholarship – semester exchange | University of Padova, Italy | Feb 2023 – Jul 2023
B.Com | University of Calicut | 2019 – 2022

KEY ACHIEVEMENTS

- Invent & Simplify Award — Amazon (Director/L8), 2026
- Best Performer of the Month (May 2026)
- Selected for a fully funded Erasmus+ KA107 scholarship to study at the University of Padova, Italy (2023)
- Research paper presented at an international conference (2024); full analysis in SAS (data manipulation, statistical analysis, regression modelling).
